
MY WARDROBE

PROBLEM TO SOLVE . . .

Sizing varies so much across different brands. International sizes are different to Australia sizes, Australian sizes are different across brands.

When I shop for clothing or footwear online, I'm always rushing off to my wardrobe and trying to find an item of clothing from that particular brand so I can then go back to my order and select the correct size.

The purpose of MY WARDROBE is to store that information for us in an app so you have reference to it there and then, saving you time looking for it in your physical wardrobe.

Size discrepancies

In any woman's wardrobe it's not unusual to find an assortment of sizes, ranging from 10 to 16. For others, the size range of clothes available in stores might not fit them at all. A study conducted by the University of South Australia and SHARP Dummies in 2002 found that about half the people surveyed said they couldn't buy "regular"-sized clothing as it didn't fit their body shape, and it seems things haven't improved since.
